47 Powertec Room Planner Guide

Performance and Quality

We would like to thank the many people over the years who have chosen Powertec and those considering our strength equipment for the first time.

Our brand continues to become more established through our network of fine authorized Powertec dealers worldwide in addition to our strong online presence in which our website www.powertecfitness.com continues to evolve with the latest technology to help you attain detailed knowledge of our product line including complete product descriptions, video and our new interactive room planner.

We continue our drive to introduce new products. We were the first to develop Plate Loaded Gyms and have successfully established Powertec as the pioneer and leader in this area of strength equipment. LeverGym™ machines provide the natural resistance of free weight with the safety of a machine.

We released our highly successful "Workbench Series" over a decade ago and have sold thousands of Gyms and Systems to homes and light commercial applications worldwide. We are now excited to announce the expansion of our highly successful "Build your Workbench" accessories for 2011! Introduced in 2010,

the accessories are a line of individual, innovative machines that plug into all Workbench Gyms and Bench Systems providing additional workout stations and allowing you to design your own gym.

The years have been exciting for us and we continue to grow even during these tough economic times. We have never lost sight of our objective and vision to provide a line of strength equipment that successfully combines high quality construction with precise function at a truly affordable price. That has been and remains our goal from day one! The progress continues.

Powertec continues to gain a very dedicated following of repeat customers over many years. The main reason being that our equipment is carefully engineered to be precise in function and fits most every user. Powertec equipment is also built to take a serious beating. We came from the commercial gym background so we have many years of experience in building equipment for the most demanding market that accepts nothing but perfection.

SPECIFICATIONS:

Redesigned New Features

New for 2011, Powertec has made a number of global updates on their equipment: Black, plastic, embossed end caps, logo embossed on workbenches (updated from vinyl Logo slipcovers), plastic ends on tricep pushdown cable bars and pull up bars, and improved handle material.

WARRANTY:

- Lifetime on frames (excluding paint finish)
- 2 years on component parts (bearings, spring pins)
- 1 year on pads, grips and unspecified parts.

FRAMES:

All Powertec frame structures are mig welded and consist primarily of 2 - 4" square and rectangular tubing with a wall thickness of 2.5 mm or 12 gauge. All of our steel materials are of the highest-level grade available.

FINISH:

Steel frames are thoroughly cleaned and treated. They are then painted and baked in a hard, durable powder coat finish. Powertec is one of the only consumer companies to offer multiple colors in some select models.

COMPONENTS:

Parts such as aircraft cable, ball bearing reinforced pulleys, side mounted and linear bearings, nylon precision bushings, and spring loaded pins are all industrial grade to ensure a smooth and quiet operation. PVC scratch guards are located on all weight horns to protect the product from scratching.

UPHOLSTERY:

Pads are constructed of thick, high-density foam surrounded by top grade upholstery for a firm, contoured feel. Powertec is also the only company to provide all roller pads with an upholstered finish, which are secured with an aluminum end cap.

HARDWARE:

Hardware components such as 1/2" nuts, bolts, washers and knobs are all high tensile strength to withstand heavy usage and stress.

PACKAGING:

Each part is individually wrapped and protected inside an extra strength layer corrugated box designed to minimize damage during shipping. Each product includes an owners manual detailing assembly procedures.

TESTING:

Weight capacities are tested to a recommended safe range based on maximum load usage.

WORKBENCH LEVERGYM™

"Awesome look, real results!"

KEY FEATURES

Improved for 2011! Increased stability with revised legs on each side and a two-point secured footplate (pic 2, left).

Total Body Training:

Over 16 of the best and most effective classic strength training exercises built into this gym to work every muscle group to its maximum providing precise function.

The LeverGym™ Advantage:

The Lever Arm drives the exercises. Weight plates are loaded directly onto the lever which simply replaces the barbell, thus providing the natural feel and resistance of free weight with the safety and control of a machine.

Power Lifting Access:

The LeverGym™ incorporates a lock and load removable bench section (pic 3, left) opening up the lever area for power exercises such as squats, shrugs and rows. The bench has wheels for easy in and out access and includes handlebars for gripping during leg exercises.

For more exercises, please visit our website.

* Weight Plates Not Included.

Build your Workbench

An access tube and knob lock pin have been incorporated into the LeverGym™ providing the new "Workbench Machine Accessories" to be added to your gym.

WORKBENCH MULTISYSTEM

"Still The #1 Best Selling LeverGym™ in the World!"

KEY FEATURES

Improved for 2011! Redesigned to fit more comfortably in tight spaces, the MultiSystem now features a decreased footprint size and head clearance. Additionally, two modular accessory connection points are now available on the MultiSystem, making it a true three person workout solution.

3 Person Access Simultaneously:

This gym provides multiple user access opening up all types of applications from the home into many light commercial settings. The footprint remains quite compact for a multiple station gym.

Over 12 Single Station Machines:

Each station is pre-set to provide it's own individual exercise machine. The user can move quickly from station to station with minimal adjustments

The LeverGym™ Advantage:

Lever Arms drive the exercises (pic 2, left). Weight plates are loaded directly onto the lever which simply replaces the barbell thus providing the natural feel and resistance of free weight with the safety and control of a machine.

Virtually Maintenance Free:

The Workbench MultiSystem has no cables or pulleys. All exercises incorporate bearing driven lever arms to provide a smooth and quiet operation.

For more exercises, please visit our website.

is a certified fitness instructor, Pro fitness competitor and runs the website www.robriches.com which is both an online portfolio and training tool for others.

In conjunction with LA Muscle, Riches was both producer and host of many of the 'on-location' shows for LA Muscle (on Sky TV throughout Europe to over 11 million homes), interviewing celebrities at Launch parties and red carpet events.

Rob Riches'

Favorite Recipes

Vanilla Quinoa Bars

Ingredients:

60g (2.12 oz) Vanilla protein powder (I use Gold Standard by Optimum Nutrition)

50g (1.76 oz) Cooked Quinoa
40g (1.41 oz) Steel Cut Rolled Oats
1 tsp of Almond or peanut butter
25g (0.88 oz) Organic raisins
100g (3.53 oz) cottage cheese
½ Tbsp cinnamon
2 tsp of Stevia/Xylitol or sweetener
¼ tsp of nutmeg (optional)
¼ tsp of allspice (optional)

Directions:

1. Scrub the quinoa with your hands in a fine-mesh strainer under cold running water for a minute or two to rinse the bitter saponin from its surface.

2. Soak overnight with the oats overnight in a medium stainless-steel or Pyrex saucepan in 3 cups (1.5 pint) of water.

3. Bring to a gentle boil over medium-high heat, stirring frequently to prevent the oats from sticking to the bottom.

4. Reduce the heat to low and simmer for 25-30 minutes, still stirring frequently, until it has the consistency of a thick porridge.

5. Stir in the cottage cheese along with the almond butter and vanilla powder during the last few minutes. The raisins are optional, although you can experiment by adding things like applesauce, chopped dates, or banana.

6. Turn off the heat and add the flavor enhancers - cinnamon, nutmeg, allspice, and sweetener.

7. Pour the mixture into a square 9x9 baking dish and spread evenly.

8. Refrigerate for 20 minutes or longer to let the mixture cool, then cut into slices.

9. Use coconut oil to lightly oil a frying pan over medium heat and fry the slices on both sides until golden-brown and crispy.

WORKBENCH MULTIPRESS

"All of the best pressing exercises with total safety and control!"

KEY FEATURES

The Workbench Advantage:

The lever arm drives the exercises. Weight plates are loaded directly onto the lever arm which simply replaces the barbell thus providing the natural feel and resistance of free weight with the safety and control of a machine.

Isolateral Arm Movement:

Redesigned for 2011! Each lever press arm can now independently move from the other for an even more targeted workout.

Powertec bench linkage system:

The MultiPress incorporates a Powertec linkage mechanism that allows for the bench section to pivot from the front to the rear locked position with ease for the purpose of the shoulder press exercise and to provide front stability support for all available accessories.

In addition the rear position is used to save space when the machine is not in use.

Accepts accessories:

The MultiPress includes the front tube adaptor that accepts all Workbench Machine Accessories.

SPECIFICATIONS:

Model # WB-MP11

Lever Press Arm starting weight w/o plates = 20 LBS
Capacity of 200 LBS / Arm

Julien Greaux

20-year MMA Expert, Actor, Model

Model**bios**

Julien Greaux is a fitness training expert, Team BSN sponsored athlete, cover model and Mixed Martial Arts director at jamcore training. Inspired by popular action movie actors, Julien Greaux began studying martial arts and exercising at the age of nine.

He's been training since he was 15 years old and have been practicing martial arts such as Karate, Taekwondo, Thai Boxing, Judo and Ju Jitsu. In 2002, he relocated from his native St. Barts to the U.S. and was discovered by world famous photographer Irvin Gelb, and introduced him to Weider Publications.

Today, Julien now calls Los Angeles home and is one of the most recognizable faces and physiques in the health and fitness world, having graced more than 20 magazine covers including Muscle & Fitness Europe, Fitness RX For Men, Combat Magazine and Karate Bushido.

Julien's combination of razor-sharp conditioning, amazing abs, energy and engaging personality has helped him build a huge fan base, and has caught the attention of many a Hollywood producer and director. Julian signed a movie deal and he is set to play the lead in a Martial Arts action trilogy "Wings Of The Dragon", filming and release dates are yet to be determined.

Chady Dunmore

Professional Bikini Competitor, Singer, Actress, Model, and Mother

Model**bios**

Raised in Miami, Florida, Chady Dunmore has had a love of sports and fitness since she was a child. She has faced a number of medical challenges with a kidney disease from the age of 4 being just the beginning. At the age of 8 she began her training in Taekwondo, and by 12 she earned her black belt. Immediately after she transitioned to cheerleading and gymnastics, and was able to find time to model professionally at the age of 16.

Modeling and cheering her way through college, staying fit became a passion. After college and having a successful modeling career, Chady decided to move to California and tune her skills as an actress.

Being a mother of a 4 year old, she put her fitness skills to the ultimate test; having gained 70lbs during her high risk pregnancy due to her continued battle with her kidney disease. She re-sculpted her body into a bikini fitness model.

She was discovered by Photographer Mike Byerly and suggested she joined the FMI (Fitness Model International) conference. Since then, she won several fitness competitions and appeared in a number of fitness magazines, including a 10 page feature in Fitness RX Magazine last June 2010 and the Oxygen Magazine's Special Fat loss edition cover for January 2011.

Accomplishments

2009 Fitness Universe - Figure Tall 12th place

Swivel chin up bar:

In addition to the horizontal and neutral grips, the chin up section also includes a swivel straight bar that allows for close grip access to train the biceps.

SPECIFICATIONS:

Model # L-CDA+11

Weight Capacity: 400 lbs body weight

Note: (Capacities are fully tested to a reasonable load rate)

* Weight Plates Not Included.

Kelechi Opara

Model**bios**

Former Marine, Entrepreneur, and Professional Fitness Model

Kelechi Opera was born in Detroit, Michigan to Nigerian parents. He has a broad international experience starting at a young age - moved to Nigeria from age 5 through 12, and through the United States Marine Corps he toured through Afghanistan, Japan, Oman, Dubai, Kuwait, Iraq, etc. His story of dedication and perseverance to fitness even in the toughest conditions is inspiring and we let Kelechi tell his story in his own words.

Tell us about how you kept up your fitness while in the Marines.

My time in the Marines lasted almost 6 years with my last tour in Afghanistan. My unit and I were one of the first to hit the ground a month and half after 9-11.

Even in Afghanistan, I was still working out though there was absolutely nothing there but bullet riddled buildings and a lot of graves of the former occupants of the place we were occupying.

We were camped with the Navy seals so I used the make shift pull up/dip bars they made up out of rusted out poles and sand bags to workout.

Since your military service, what do you do?

I left the Marines in 2002 and have traveled all over the world working for an Aerospace company (aviation electronics) from Japan to Oman to Dubai to Kuwait to Iraq.

Accomplishments:

Appearance in 7 different fitness magazines since April 2010
Owner of an upcoming nutrition application specifically for the iPhone and Android with partners Troy and Kaile Gleason

WORKBENCH DUMBBELL RACK

"A slick, quality built rack that stores all types of dumbbells"

KEY FEATURES

Multiple level storage access with safety in mind:

The Workbench Dumbbell Rack provides two levels of storage holding approximately 6-7 sets or 12-14 normal sized dumbbells. The steel tubing is neatly angled for ease of removing and storing the dumbbells. Angled steel bars and end stoppers lock the dumbbells in place at all times.

SPECIFICATIONS:

Model # WB -DR10

Weight capacity: 1500 LBS

Note: (Capacities are fully tested to a reasonable load rate)

* Weights Not Included.

Natalie Minh's *Favorite Recipes*

Spicy Fitness Meatballs Recipe

Ingredients:

500g (1.25 lb) extra lean ground beef
1 tbsp garlic powder
2 tbsp dried oregano
3 tbsp soy sauce
1 mini tin of tomato paste
2 tbsp harissa paste (spicy Arabic paste)
1/2 minced medium onion
1/3 cup oats

Directions:

1. Set the oven to 350F or 180C.
2. In a pan, saute the onions with a little water instead of oil until translucent.
3. Combine all other ingredients in a separate bowl, including the onions.
4. In a shallow oven pan, make 10 meatballs out of the meat and pop in to the oven for 20 minutes.

Tiramisu!

Ingredients:

6 large egg whites
1/4 cup ground oats (to make oat flour), or equivalent flour
1/2 tsp cream of tartar (or if you don't have use 1 tsp baking powder)

3 tbsp vanilla extract
1/3 cup sweetener or equivalent Stevia
500g of 0% fat fromage fraise or 0% fat greek yogurt or (low fat ricotta cheese as last option IMO)
1 shot of espresso (I used instant espresso)
big sheet of parchment baking paper or a big rectangle nonstick pan.
1/8 cup cocoa powder or if you are hardcore, use chocolate protein powder

Directions:

1. Set the oven to 350F or 180C.
2. Using a hand mixer or equivalent attachment on a food processor, beat the egg whites, cream of tartar, oat flour, and 1tsp vanilla extract together until you have stiff peaks.
3. Pour the egg white mixture onto the parchment paper which lines the big pan (or use a oil sprayed pan) and smooth the top of the mixture.
4. Put into the oven for 15-20 minutes until golden.
5. In a big bowl, mix the fromage fraise, remaining 2 tbs vanilla extract, and sweetener together. When the egg white mixture is done, pull out of the oven and evenly pour the espresso onto it. Once this is done, cut it down the middle so that you have two sheets.
6. Using another pan half the size of the one you used for baking the egg whites, lay down the first egg white sheet, then smooth 1/2 of the cheese mixture on top.
7. Sprinkle on half of the cocoa powder. Then lay down the next sheet and repeat.

LEVERGYM™ COMPACT GYM

"All of the best exercises at a fraction of the space!"

KEY FEATURES

Advantages:

The LeverGym™ Advantage: Lever Arms drive the exercises. Weight plates are loaded directly onto the lever which simply replaces and provides the natural feel and resistance of free weight with the safety and control of a machine.

Folding Bench:

Compact sliding bench with 3 – way adjustable positions

Reduced Foot Print:

Extremely compact and will fit in most small spaces (pic 2, left).

Heavy Weight Capacity: Small foot print but can load up to 300 LBS.

Jamin has become an inspiration for people across the world with his amazing recovery from a debilitating and almost deadly gastro-intestinal disease.

After a two year battle with the illness, he lost over 40 pounds of hard earned muscle, but was able to "heal" himself using natural whole foods, and real nutrition. Now he helps others get healthier, leaner, and stronger using the same principles and shares this information with anybody who is serious about improving their health & physique.

For the past 10 years, Thompson has had the opportunity to work with hundreds of people, from elite athletes to corporate CEOs and has personal training clients in over 100 countries.

Jamin has worked extensively with athletes on the professional and collegiate level and as an ex-Division 1 and professional athlete himself, Jamin uses his real world, in the trenches experience to help others unleash their true fitness potential.

Using the same type of high intensity programs and techniques that create world class athletes, Jamin helps "regular Joes" unlock their genetic potential using a no nonsense, no gimmick approach.

Thompson has an MBA, Masters in Business Administration from The Citadel in Charleston, South Carolina, a Bachelors Degree from Clemson University.

"Strengthen your lower back, glutes and abs in a comfortable and precise position"

You can find Key Features in page 37

Jamin Thompson's *Favorite Recipes*

Grilled Chicken/Turkey /Bison/ Sausage Tostadas

Ingredients:

Pam cooking spray
1 package Trader Joes or Whole Foods Brand Spicy Italian Sausage (4pack) You can substitute a pound of lean ground meat for the sausages if you want (I like using grass-fed beef, ground bison, grilled chicken, and ground turkey and I get most of my lean meat from the good folks at Grassland Beef)
6 Ezekiel Sprouted Grain Tortillas
1 Tbsp fresh lime juice
1 cup fat-free refried beans
3 cups lettuce, shredded
1 (8-ounce) jar salsa
1/2 cup (4-ounces) low-fat crumbled feta cheese
6 Tbsp reduced-fat sour cream
1/4 cup unsalted sunflower kernels, toasted
1 serving Bearitos low-sodium taco seasoning (you can find this at Whole Foods)
2 cups tomatoes, chopped and seeded
3/4 cup sweet onion, diced
1/4 cup ripe olives, chopped
1/4 cup fresh cilantro, finely chopped
1/4 tsp freshly ground pepper

Directions:

1. Spray the grill with cooking spray and preheat. I like to use a George Foreman Grill because it is quick and easy. Brush the ground meat with lime juice and sprinkle with low sodium taco seasoning.

Note: You do not have to use the taco seasoning if using the chicken sausages.

2. Place sausage links on preheated grill rack and grill 3-4 minutes. Allow sausage to cool slightly then cut into 1/2 inch pieces and set aside.

3. Place tortillas on sprayed grill rack and grill for 30 seconds on each side until crisp and golden brown.

4. In a medium bowl, toss together tomatoes, onions, olives, cilantro, lime juice and pepper.

5. Spread 3 tablespoons of refried beans over each tortilla and evenly divide chicken sausage between the tortillas.

6. Top with 2 tablespoons salsa, 1/2 cup shredded lettuce, 1/2 cup tomato mixture, 2 tablespoons feta cheese and 1 tablespoon sour cream.

7. Sprinkle with fresh cilantro and sunflower kernels. Garnish with scallions, fresh limes and cilantro.

POWERTEC BASIC TRAINER

"Strengthen and shape all your muscles with this complete bodyweight rack system"

KEY FEATURES

New design:

The new basic Trainer now provides all of the exercises from the front side making the rack much more compact.

Multiple gripping access:

Numerous grip positions are available to accomplish the different exercises. The chin-up section also incorporates a swivel straight bar for close grip training.

Leg Raise

Chin Up

Dip

Push Up

SPECIFICATIONS:

Model # P-BT10

Weight capacity: Chin up and Dip bars = 400 LBS BODYWEIGHT
Note: (Capacities are fully tested to a reasonable load rate)

LEVERGYM™ SQUAT/CALF

"Still the original best selling leg machine on the market!"

KEY FEATURES

The perfect motion:

By setting the foot plate at the correct angle and properly positioning the weight plate load, all stress and pressure is taken off the lower back and knees. The resistance is focused totally on the thighs to drive the motion.

Calf Raise

Machine Squat

Start/Stop handle:

An innovative slide handle bar is incorporated that allows the user to start and stop the exercise in the top position. There is also a fixed safety stop position built in.

SPECIFICATIONS:

Model # L-SC10

Squat Lever Arm = 500 LBS

Note: (Capacities are fully tested to a reasonable load rate)

* Weight Plates Not Included.

POWERTEC DUAL HYPEREXTENSION/ CRUNCH

"Strengthen your lower back, glutes and abs in a comfortable and precise position"

KEY FEATURES

Dual hyperextension access:

This is the only bench of its kind that provides access to performing the hyperextension at a fixed 45 degree angle or at the traditional horizontal position.

Multiple adjustments:

Numerous adjustments are available on the foot plate, rollers and seat to accomplish three different movements for all body types.

45 Degree Hyper

Oblique Crunch

Ab Crunch

SPECIFICATIONS:

Model # P-HC10

Weight capacity: Bodyweight limit = 400 LBS

DUMBBELL RACK
"A slick, quality built rack that stores all types of dumbbells"

You can find Key Features in page 29

POWERTEC COMPACT LEG SLED

"Still the most compact, smooth leg press in half the space!"

KEY FEATURES

Precise Motion

The sled is driven by nylon bearing wheels that provide an ultra smooth and quiet ride. The carriage holds 8 wheels that hug the solid steel guide rods preventing lateral movement and providing a precise motion from top to bottom.

Comfortable position:

The seat and adjustable back pad along with the adjustable angle foot plate and hand grips lock the user into the perfect position to perform the exercise.

Compact design:

The design of the carriage and seat section allow for a leg sled that is significantly more compact than any other in it's class. A foot tube is also included to provide calf raises.

SPECIFICATIONS:

Model # P-CLS11

Weight Capacity: Sled = 700 LBS

Calf Raise

Leg Press

Note: (Capacities are fully tested to a reasonable load rate)
